Customised Payroll Solutions

Our Customised Payroll Solutions (CPS) experts assist you from set up and registration in a new location for a new business or a new employee, to routine payroll compliance and cost management. Across our global organisation, we have specialists who can help you with many payroll-related matters, such as:

- › Payroll compliance and costs management planning
- › Preparation of shadow or split payrolls
- › Set up of payroll systems in new locations
- › Management of international payrolls
- › Analysis of the taxability of wages and benefits in each jurisdiction.

We also advise on implications of short- and long-term assignments and we can provide clarity on tax and social security reporting.

The Global Equity Services group also has a number of useful tools for our clients

Sharing our knowledge with you

As part of our proactive service, we provide clients with regular updates on matters that interest them. For example, the BDO Expatriate Newsletter is a regular publication featuring concise articles written by BDO expatriate tax experts and the Global Equity Services group publishes country summaries and updates. We host webinars and in-person technical updates for clients and we publish thought leadership articles on a wide range of tax and business management issues.

Our approach to client service

Our approach to serving clients is based on the idea of partner-led service, rather than partner directed service. And, because relationships matter to us, the BDO team working with you is led by someone you see and deal with regularly – not some remote figurehead. This hands-on approach means we respond quickly and you don't have to tell us things twice. With one central point of contact, we ensure timely follow-up on all issues.

We offer business advice, not just technical solutions. We listen to you and make sure we understand your unique requirements and then we provide tailored, specific advice. And, because we see ourselves as an extension of your team, we work with you to deliver our services on time and on budget.

To ensure excellent client service and because we know our clients value continuity and responsiveness, you'll find that each member of our team is specifically chosen because they:

- › Have substantial experience working with similar organisations
- › Have a demonstrated interest in working with you
- › Do not have other work commitments that will interfere with their ability to serve you.

Also important to our ability to provide exceptional client services is the fact that our team members operate in a supportive environment and are empowered to make decisions and raise and address issues before they impact your business.

The personal touch

We know that your employees are a critical part of your business and that their satisfaction is important to you. We also know that the expatriate process can trigger a number of issues for you and the assignee. We see ourselves as an extension of your team, working with you to ensure your assignees are well served. For example, the BDO team member who conducts an assignee's tax briefing is usually involved in preparation of that individual's tax return and is the point of contact for them if they have questions. Such continuity means your assignees don't have to deal with multiple people and they know whom to turn to with questions. Our low staff turnover helps clients build long-term relationships with our people.

Our global tools and methodologies feature ease of use and design for you, your assignees, and our team. But, we don't replace personal service with technology. Instead, we use technology to supplement and enhance our personal service. We do not use compliance centres or offshore centres to disseminate, prepare, or deliver tax returns.

Value added service

Because the notion of value is different for all our clients, we strive to identify those things that are particularly relevant to you. In all engagements, however, we deliver value in four main ways:

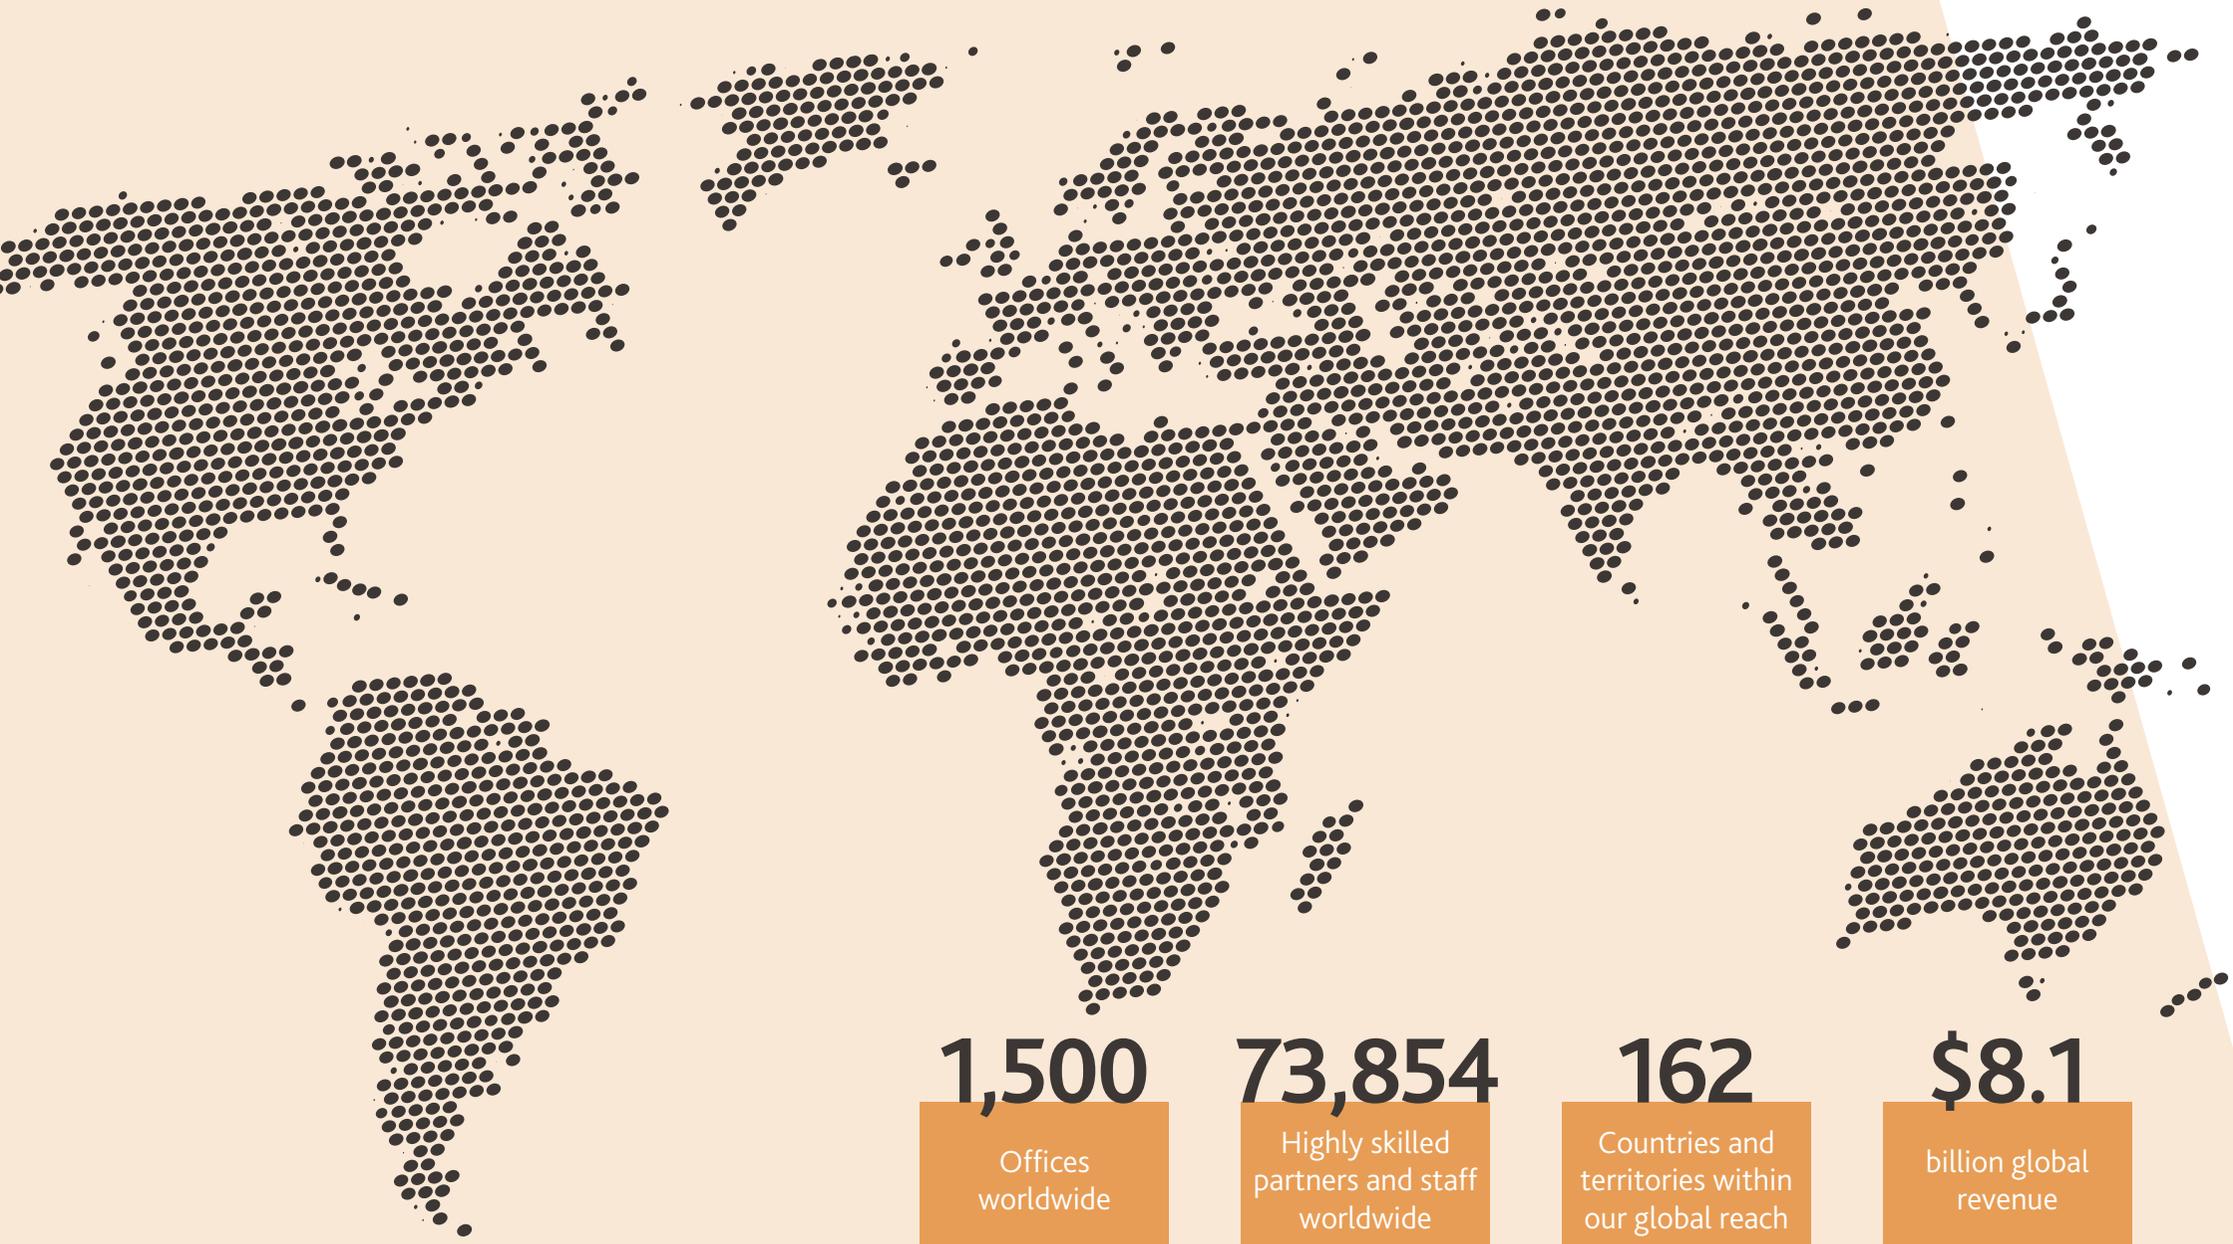

- › Through our people who deliver the service
- › Through our approach to delivering the service
- › Through the bottom line cost of a given service
- › Through the additional options we offer as part of the service.

These four things, combined with the depth and breadth of our services and our streamlined organisational structure is what sets us apart from our peers.
